

# PROTECTIVE MASK BASIC

A three-layer protective mask that reduces the effects of external factors on the body (such as viruses, bacteria, mold spores). Our mask limiting the effects of harmful external factors. It does not block them completely.

The product consists of three layers of delicate and skin-friendly material certified by OekoTex. The certificate is issued for products which are fully safe for human and environment. Hygienic products of this type are used, among others, in the food and pharmaceutical industries, and have recently been available due to government restrictions.

The mask offered by us is light, comfortable, nice in touch and does not obstruct breathing. May be used many times and washed/boiled at high temperatures. It does not deform when worn or stored. Its ergonomic shape and fitting rubber bands allow comfortable wearing during various activities. Because of the high market demand, colour of the rubber fitting bands is randomly selected.
